FOR IMMEDIATE RELEASE

Celebrating 20 Years in Business with Upgraded Office Suite

Select Telecom Rings In 20th Year of Operation with Move to 333 Westchester Ave.

Westchester County, NY – February 1, 2016. With 2015 having come to a close, Select Telecom is proud to announce that the company has completed its 20th year in operation, and will be celebrating with a move this spring to an upgraded office suite at 333 Westchester Avenue in White Plains.

Select Telecom was incorporated in January of 1996, commencing operations that April in Stamford, CT per a distributorship agreement with longtime partner and supplier NEC. By the end of the first year, the company had almost doubled in size, expanding from only four initial employees (including founding partners Mike Durante and Jerry Moscariello) to seven full time employees and \$600K in revenue. The following year (the company's first full year in business) revenue almost doubled to over \$1M, and the momentum continued through two more moves to different locations in Stamford, several new hires, retention of over 1000 customers, and the opening of a satellite office in Raynham, MA.

After nine and a half years in Stamford and a steady \$2M revenue stream, Select Telecom moved its 20 employees to the company's current office space in Valhalla, NY in 2005. The past ten years have seen the company's revenue continue to expand, hitting a high of \$4M in revenue immediately following the Great Recession and maintaining a staff of 20-25 employees throughout even the toughest years of the economy, including zero recession-driven layoffs – one of the company's proudest achievements.

With a 10-year lease in Valhalla up in 2015, Select Telecom evaluated several potential locations in New York and Connecticut is excited to announce that the company has decided to stay in Westchester County, securing a 5,900 square-foot suite in the former General Foods building at 333 Westchester Avenue. Select Telecom selected this complex for its centralized location providing easy highway access to customers across the Tri-State Area, and is eager to tap the strong pool of highly educated candidates in the local area for future hiring. Employees are also enthusiastic about upgraded amenities such as an on-site gym and cafeteria, large meeting rooms, and shuttle to the White Plains train station.

Construction of the modern new office suite is currently underway and a move is planned for spring of this year. Select Telecom looks forward to continuing the company's long legacy of growth and loyal service to customers from this new location for many years to come.
